VIAFLO II Lightweight Electronic Pipettes
Your pipette tips will never loosen, leak or fall off again!

# VIAFLO II Lightweight electronic pipettes

VIAFLO II electronic pipettes together with INTEGRA's wide range of GripTips form a perfect pipetting system. GripTips snap into place with minimal tip loading effort, providing a secure connection. GripTips never fall off and are always perfectly aligned, resulting in superior accuracy and precision results.

The ultra lightweight, well balanced design of the VIAFLO II pipettes feature unsurpassed multichannel pipetting ergonomics, even during prolonged pipetting sessions.

The color screen together with the easy to navigate touch wheel user interface promote ease of set up and operation. All VIAFLO II pipettes offer a choice of predefined pipetting modes covering typical applications as well as custom multi-step programs for specific tasks.

The rim of the GripTips will snap over the Multi-Lobes, attaching firmly. As a result, GripTips will never accidently fall off, even after several touch-offs.

Lobes

**O-Ring** 

Rim

snaps

Lobes

over the

A shoulder provides a positive stop to prevent over-tightening of the tip. The pipette tip cannot be advanced beyond the positive stop ensuring all tips are at the same height, thus increasing the precision when touching off. That means, the tip is either on or off, but nothing in between. Hammering the pipette into the tips to make sure they attach correctly is no longer required.

#### GripTips snap on

Do your pipette tips ever loosen, leak or fall off? This is a common issue in laboratories, caused by the use of universal pipette tips. Such tips require "hammering on" which stretches the shape of the pipette tip rim. The stretched pipette tip rim immediately starts moving back to its original shape, away from the tip cone. This can cause leaking, misaligned tips and even pipette tips that completely fall off the pipette!

This will never happen with any VIAFLO II electronic pipette / GripTip combination. Featuring a low attachment force and a low ejection force, GripTips effortlessly snap onto the tip fittings and are easily ejected. Also, GripTips feature a high lateral resistance once attached to the VIAFLO II pipettes. This means GripTips are always firmly attached and perfectly aligned, regardless of how many side well touch offs are performed. You no longer have to hammer your pipette tips on or worry about pipette tips falling off!

#### Versatile user interface

A color screen and proven touch wheel interface offer quick and comprehensive menu navigation. Simply by moving a finger over the touch wheel, menus and settings can be accessed. All menus are spelled out on the clear to read screen making memorizing abbreviations unnecessary.

A choice of ten predefined pipetting modes provides users with convenient solutions for the most common liquid handling tasks. Standard pipetting routines, such as repeat dispensing or serial dilutions can be executed with minimal set up time.

For more elaborate pipetting routines, up to 40 personalized custom programs can be created and saved. Custom programs can contain up to 98 individual steps based upon the following basic operations: Aspirate, Dispense, Mix, Purge and Prompt.

# Ergonomic design

The new VIAFLO II pipette offers perfect balance, an ultra lightweight design, unsurpassed operational comfort and is ideal for both left and right handed users. The effortless tip attachment and ejection forces add to the ergonomic benefits that accompany the use of VIAFLO II electronic pipettes.

#### **Repeat Dispense**

Multiple dispensing of aliquots of the same volume without refilling the pipette tips after each dispense for rapid microplate filling.

#### **Serial Dilute**

Sequential transfer of a defined volume from one column to the next followed by a defined mix for convenient serial dilutions.

## **Manual Pipet**

Only aspirate and dispense while the RUN button is being held down. Unlike a manual pipette, both volume and speed values can be set. Manual pipet mode can also be used to measure unknown volumes and perform titrations. The actual volume in the pipette tip is also shown on the display!

#### **VIAFLO ASSIST**

The ultimate ergonomic solution to multichannel pipetting! Simply insert one of the thirteen available VIAFLO II pipettes into the VIAFLO ASSIST platform. Press the run button and watch the VIAFLO ASSIST pipette for you! The VIAFLO ASSIST is ideal for serial dilutions and reagent additions. Visit the INTEGRA website for more information.

# **Charging options**

Pipettes can be charged directly with the pipette mains adapter (4200).

The single pipette charging stand (4210) and the carousel charging stand (4215) offer space saving charging options. The charging/ communication stand (4211) additionally enables the communication of a pipette with a PC and VIALINK, a pipette management software from INTEGRA.

The linear stand (3215) accommodates all types of INTEGRA pipettes.

It can be easily converted into a charging stand, by equipping up to four charging stations (3217) and a mains adapter (3216).

Alternatively, a charging/communication station (3218) can be equipped to enable the communication of a pipette with a PC and VIALINK.

# Reagent reservoirs

Disposable reservoir inserts designed to save you money and space! Available in 10 ml, 25 ml and 100 ml configurations.
